FUJI Elevators

Company Introduction

Fuji Elevators Australia Pty Ltd is a “One Stop Shop”, when it comes to Elevators and Escalators Maintenance, Repairs, Modernisation, New Installation and Car Interior Upgrades.

We pride ourselves on the products we import from our preferred suppliers. These are some of the best in the industry with a proven track record of reliability, great ride quality and excellent after sales service. It is the little things that make the difference and when you ride in one of these elevators, you will feel all the components coming together, delivering one of the smoothest rides in the industry.

It is this point of difference that makes Fuji products stand out along with their great reliability.

Our elevators meet all the current codes EN81 and AS1735. This not only provides peace of mind but ensures when you buy an elevator from Fuji Elevators Australia, it is compliant to Australian standards.

Our Company can provide a wide range of Elevators suiting many applications, from highspeed, high rise commercial buildings, to apartment complexes and retail applications. We also provide Car Stackers & Goods Elevators.

When buying an Elevator from Fuji Elevators Australia, our suppliers are able to provide a number of elegant standard finishes which is contained in this brochure. We are however also able to customise the interior to meet your application. This customisation is not part of our standard elevator packages and an additional cost would apply.

At Fuji we look forward to providing you with quality and excellent customer service.
